

PROFESSIONAL PROFILE

Systems Engineer focused on the development of technology solutions and web applications, with hands-on experience building, integrating, and maintaining software. I have worked on developing features from requirements, integrating APIs and external services, database management, and application deployment. I focus on analyzing problems, solving technical needs, and optimizing processes using artificial intelligence as a support tool for development.

TECHNICAL SKILLS

DEVELOPMENT

React · React Native · Node.js · Next.js · NestJS · JavaScript · TypeScript

ARTIFICIAL INTELLIGENCE & AUTOMATION

AI API Integration · Automation · AI-assisted development · Process optimization

DATA

PostgreSQL · MySQL · Prisma ORM

INTEGRATION

REST APIs · Webhooks · OAuth2 · JWT · RBAC · HubSpot API · OpenAI API

CLOUD & DEPLOYMENT

AWS · Docker · CI/CD · Supabase · Vercel · Render · Netlify

EDUCATION

2024 Systems Engineering

Universidad de Nariño

2025 Software Development Diploma

Universidad de Nariño

2025 Intermediate English (B1)

PROFESSIONAL EXPERIENCE

JAN 2026 – JUL 2026 · FREELANCE

Systems Engineer – Software Development

KEYGO | PASTO, COLOMBIA

Designed and developed a solution for the management and custody of physical assets, integrating hardware, backend services, and a mobile application. I participated in the data model, business rules, role-based access control, and operation traceability.

MAY 2025 – FEB 2026 · FREELANCE

Systems Engineer – Freelance Software Development

SOLEIA | MEXICO

I participated in the comprehensive development of the software, from defining features and structuring the interface to implementation and evolution. I built an interactive lot quote calculator focused on user experience and lead capture, working with lot data, pricing, and commercial information. I also implemented and maintained features related to handling and managing requests through email, optimizing performance, accessibility, and adaptation to different devices.

SEP 2025 – DEC 2025

Freelance Software Developer

GRAYOLA | UNITED STATES

Participated in the development of a SaaS platform, implementing user onboarding and authentication and security flows, including Google login, OTP verification, security validations, and password changes. I also conducted research on current technologies and solutions to support product and architecture decisions, and participated in analyzing the evolution of the model toward a marketplace platform connecting designers with companies that require design services.

SEP 2024 – JUN 2025

Backend Software Developer

BLACK & ORANGE | MEXICO

Integrated the corporate CRM with cloud infrastructure through backend services, webhooks, and REST APIs. I implemented asynchronous flows to automate data synchronization between systems and optimize operational processes.

MAR 2024 – DEC 2024

Junior Software Developer

SIIAN ERP | PASTO, COLOMBIA

Participated in the modernization and refactoring of Finance and Logistics modules of an enterprise ERP. I optimized transactional data processing and database integrity, and contributed to deployment automation through CI/CD.

JUL 2023 – MAR 2024

Software Developer

TECNOPLANET | PASTO, COLOMBIA

Contributed to the evolution of administrative and inventory systems. I developed and integrated REST APIs and backend services, optimizing data processing and reducing manual processes in operations.

FEATURED PROJECTS

LEMARJ — B2B SaaS Platform

Designed the multi-tenant architecture and integrated AI APIs for automated conversational agents, applying access control and security measures.

Mallku — E-commerce Platform

Developed the administrative dashboard, automated catalog management, and implemented image processing.

Request Management — Enterprise Platform

Implemented analytical dashboards and transactional data flows to support management and decision-making.

Recuerdos Levj — Personalized E-commerce

Participated in structuring the application, customized the shopping cart, and implemented real-time inventory management. I also worked on connecting the business process with WhatsApp and managing cloud advertising through Meta tools.
