

Valeria Alejandra Alarcón Andrade

SYSTEMS ENGINEER · FULL STACK DEVELOPER · SAAS & B2B

Portfolio LinkedIn GitHub

PROFILE

Systems Engineer with 3+ years of experience building end-to-end digital products for clients in Colombia, Mexico, and the USA.

Specialized in secure Full Stack architectures, complex system integrations, and business flow automation. Strong expertise in React, NestJS, .NET Core, and PostgreSQL.

I thrive in international agile teams, delivering high-quality solutions from initial architecture to production deployment.

EDUCATION

2024 - Universidad de Nariño

Systems Engineering

03/2019 – 04/2024

2025 - Universidad de Nariño

Software Development Diploma

08/2024 – 01/2025

2025 - Evolve Your English

Intermediate English (B1)

TECHNICAL SKILLS

- Frontend:** React 19, React Native (Expo), Angular 17+, Next.js, TypeScript, Tailwind CSS, shadcn/ui, Framer Motion.
- Backend:** NestJS, Node.js (Express), Prisma ORM, Laravel 11, ASP.NET Core, REST APIs, JWT, RBAC.
- Cloud & Infra:** PostgreSQL (Supabase), Docker, AWS, Azure DevOps, Vercel, Render, Git/GitHub.
- Architecture & AI:** Hexagonal Architecture, Clean Architecture, OpenAI API, State Machines, Microservices.

Full Stack Developer

React.js / Next.js

EXPERIENCE

FEBRUARY 2026 – PRESENT · FREELANCE

Full Stack Developer

KeyGo · Pasto, Colombia

- Built a real-time physical asset custody platform using **NestJS + React Native + Supabase**, creating a secure ecosystem that integrates hardware with a high-availability cloud backend.
- Protected sensitive asset and payment data through **multi-role JWT authentication with advanced encryption and RBAC**, ensuring the system is ready for enterprise audits.
- Modeled a complex relational system for assets, history, and payments with **PostgreSQL and Prisma ORM on Supabase**, establishing a scalable database for historical reporting.

Hardware Integration

NOVEMBER 2025 – DECEMBER 2025

Full Stack Developer

Grayola · USA

- Developed a functional and scalable Design-as-a-Service (DaaS) platform using **Next.js + TypeScript + Hexagonal Architecture**, delivering a production-ready solution with complete document management.
- Guaranteed data privacy per role without additional backend complexity through **Supabase Row Level Security (RLS)**, providing secure dashboards where users only access their own information.
- Ensured long-term product maintainability by applying **Clean Architecture and scalable design patterns**, resulting in modular, documented, and easily extensible code.

Clean Architecture

SEPTEMBER 2024 – JUNE 2025

Backend Developer

Black & Orange · Mexico

- Connected corporate CRM systems with cloud infrastructure by developing **Node.js microservices integrated with AWS and Oracle Cloud**, achieving automated data flows that eliminated recurring manual processes.
- Scaled the API architecture to support high concurrent demand by implementing **OAuth2 and RESTful Webhooks**, ensuring system stability under peak loads with enterprise-grade security.

SOFT SKILLS

- Requirements analysis and management
- Clear communication with clients and stakeholders
- Attention to detail and delivery quality
- Results-oriented collaborative teamwork

LANGUAGES

- Spanish (Native)
- English (Intermediate B1)

VIEW CERTIFICATES

- Modernized the Finance and Logistics modules of an enterprise ERP using **ASP.NET Core + C# + PostgreSQL**, refactoring the architecture to support higher transaction volumes without downtime.
- Accelerated the team's delivery cycle through **automated CI/CD pipelines in Azure DevOps**, achieving faster deployments and a significant reduction in production errors.

Performance Optimization

JULY 2023 – JANUARY 2024

Full Stack Developer

TecnoPlanet · Pasto, Colombia

- Built and maintained RESTful APIs across multiple frameworks (Django, Laravel, NestJS) ensuring interoperability between internal systems.
- Developed web tools for administrative and inventory process optimization, reducing dependency on manual flows.

FEATURED PROJECTS & OWN PRODUCTS

2025 – PRESENT · OWN SAAS PRODUCT

Co-Founder & Software Architect

LEMARJ · Pasto, Colombia

- Built the core architecture of an autonomous WhatsApp sales SaaS with a **regionalized AI** using OpenAI API, Meta's official WhatsApp Business API, and React 19. Developed the complete product from design to functional deployment in production.
- Designed a **scalable multi-tenant ecosystem** and successfully integrated the system with payment gateways and platforms (Stripe, Wompi, Meta Ads), establishing a robust infrastructure ready for high demand.
- Structured the platform with security standards ready for Ley 1581 compliance using **encrypted databases (256-bit) and Row Level Security (RLS)** in Supabase, ensuring total privacy of transactional data.

- **EliteStream Pro v2.0:** Streaming platform with 3D interactive UI, dynamic data integration, and secure authentication — React 18, Framer Motion.
- **Mallku:** E-commerce with analytics dashboard, catalog automation, and image processing — React 19, Node.js.
- **Destination Manager:** SaaS platform with real-time KPI dashboard, RBAC, and tour route management — Angular 17+, Laravel 11.
- **LEVJ Memories:** Artisan e-commerce with product customizer and WhatsApp payment flow — React 18, Zustand.

 All projects are deployed and available on **GitHub** with complete documentation (README).
