

Valeria Alejandra Alarcón Andrade

SYSTEMS ENGINEER · SOFTWARE DEVELOPER

Portfolio LinkedIn GitHub

PROFILE

Systems Engineer with 3+ years of experience building end-to-end digital products, delivering business value in enterprise environments.

I build secure Full Stack architectures, lead complex system integrations, and design automated operational flows to maximize efficiency.

I thrive in international agile teams, delivering high-quality solutions from the initial architectural design to production deployment.

EDUCATION

2024 - Universidad de Nariño

Systems Engineering

03/2019 – 04/2024

2025 - Universidad de Nariño

Software Development Diploma

08/2024 – 01/2025

2025 - Evolve Your English

Intermediate English (B1)

TECHNICAL SKILLS

- Frontend:** React 19, React Native (Expo), Angular 17+, Next.js, TypeScript, Tailwind CSS, shadcn/ui, Framer Motion.
- Backend:** NestJS, Node.js (Express), Prisma ORM, Laravel 11, ASP.NET Core, REST APIs, JWT, RBAC.
- Cloud & Infra:** PostgreSQL (Supabase), Docker, AWS, Azure DevOps, Vercel, Render, Git/GitHub.
- Architecture & AI:** Hexagonal Architecture, Clean Architecture, OpenAI API, State Machines, Microservices.

EXPERIENCE

JANUARY 2026 – JULY 2026 · FREELANCE

Full Stack Developer

KeyGo · Pasto, Colombia

- Built a real-time physical asset custody platform, creating a secure ecosystem that integrates **physical hardware with a high-availability cloud backend**.
- Protected sensitive asset and payment data through **multi-role authentication with advanced encryption and strict access control**, ensuring the system is ready for enterprise audits.
- Modeled a complex relational system for assets, history, and transactions, establishing a highly scalable database **prepared for seamless historical reporting**.

Hardware Integration

SEPTEMBER 2025 – DECEMBER 2025

Full Stack Developer

Grayola · USA

- Developed a functional and highly scalable Design-as-a-Service (DaaS) platform, delivering a **production-ready solution** that connects clients with designers and offers complete document management.
- Guaranteed data privacy per role without adding unnecessary server complexity through **strict row-level security policies**, providing secure dashboards where users only access their own information.
- Ensured long-term product maintainability by applying **clean architectures and scalable design patterns**, resulting in a modular, documented, and easily extensible ecosystem.

DockerClean Architecture

SEPTEMBER 2024 – JUNE 2025

Backend Developer

Black & Orange · Mexico

- Connected corporate CRM systems with cloud infrastructure by developing **asynchronous microservices**, achieving automated data flows that completely eliminated recurring manual processes.
- Scaled the service architecture to support high concurrent demand by implementing **real-time event systems**, ensuring ecosystem stability under peak loads with enterprise-grade security.

MARCH 2024 – DECEMBER 2024

Full Stack Developer

SIIAN ERP · Pasto, Colombia

- Modernized the critical Finance and Logistics modules of an enterprise ERP, **refactoring the internal architecture** to support higher transaction volumes without downtime.
- Accelerated the team's delivery cycle through **automated continuous deployment pipelines**, achieving faster releases and a drastic reduction in production incidents.

 VIEW CERTIFICATES

MAY 2025 – FEBRUARY 2026 · FREELANCE

Frontend Developer

Soleia · Mexico

- Programmed a high-performance web interface featuring an interactive real estate calculator, **directly manipulating browser elements** to provide a seamless experience that drove qualified lead capture.
- Optimized system performance to elite metrics by implementing **adaptive designs and modern formats**, achieving top scores in performance and accessibility.

Performance Optimization

JULY 2023 – JANUARY 2024

Full Stack Developer

TecnoPlanet · Pasto, Colombia

- Built and expanded standardized backend services across various development paradigms, **ensuring continuous interoperability** between different internal systems.
- Developed web tools focused on administrative and inventory process optimization, **reducing dependency on manual flows** and increasing productivity.

FEATURED PROJECTS & OWN PRODUCTS

- **LEMARJ (B2B SaaS Platform):** Lead Software Architect. Built the core architecture of an autonomous messaging sales SaaS with regionalized AI agents. Highly scalable multi-tenant ecosystem, seamlessly integrated with financial and advertising platforms, featuring military-grade encryption and row-level access control — React 19, TypeScript, Supabase, OpenAI API, WhatsApp Business API.
- **Mallku:** E-commerce with analytics dashboard, catalog automation, and image processing — React 19, Node.js.
- **Destination Manager:** SaaS platform with real-time KPI dashboard, RBAC, and tour route management — Angular 17+, Laravel 11.
- **LEVJ Memories:** Artisan e-commerce with product customizer and WhatsApp payment flow — React 18, Zustand.
- **Movie Platform:** Streaming platform with 3D interactive UI, dynamic data integration, and secure authentication — React 18, Framer Motion.

 All projects are deployed and available on **GitHub** with complete documentation (README).
